

## Introduction of Telesis EV25 End-Pumped Vanadate Laser Marking System

Telesis Technologies announces the addition of the EV25 End-Pumped Vanadate Laser Marking System to the laser marking line.

This new product is available at extremely attractive prices beginning at \$49,000.00 with prices varying slightly with lens and fiber cable length selections.

This laser features:

- Outstanding beam quality for height resolution graphics and fine 2-D codes
- Large focal tolerance accommodates curved or uneven surfaces
- Great for many heat sensitive materials such as silicon or thin foils
- Robust design with pumping diodes located inside the controller
- Pumping diodes have an MTBF of over 20,000 hours and are easily replaceable
- Mark-on-the-fly capability
- Air-cooled
- Powerful but easy to use **Merlin®** II LS Visual Design Software

Give us a call at **Hillcrest Enterprises (804)798-8390** for further details.

**Specify Telesis Part Number 66260**
