

Merlin® III

Visual Design Software for TMP6100/470

NOW AVAILABLE FOR TMP1700/470 AND TMP3200/470

A new version of **MERLIN® III** providing connectivity to both the TMP1700/470 and TMP3200/470 systems is now available. This same version, V2.1x, still can be utilized along with TMP6100/470 systems **that are equipped with TMC470 software versions V3.10 or higher**. In addition, it includes one new additional feature, a Log Tool, which provides the ability to log formatted data to an ASCII text file for record keeping purposes. For example, a text file can be updated during each print cycle with a time-stamped record of the marked data. In order utilize this new version **MERLIN® III** interface, TMP1700/470 and TMP3200/470 systems must each be equipped with software versions of 2.0 or higher.
