

Pneumatic Crimping Tool – In Stock!!!

Hillcrest Enterprises now stocks the Pico Corporation 400 Series Pneumatic Crimping Tool

No more 12 week wait to get this equipment – **Hillcrest** now has it in stock!!

This versatile, lightweight, pneumatic powered crimping tool handles a broad range of requirements for commercial, space and military applications.

The full cycle design insures the user a perfect crimp on every contact that meets tolerance requirements. This multi-faceted tool has been designed to work with a variety of applications, including pin and socket contacts, solderless terminals, and a variety of custom non-connector specific applications.

Non-adjustable die heads, ensuring quick setup, are interchangeable between all models within the same series. Critical parts are manufactured with high-strength S-7 tool steel, ensuring light weight and durability.
